

Overview

Shipshape AgWorks specializes in designing and implementing cutting-edge vertical farming solutions for businesses, communities, and institutions. Our expertise in controlled environment agriculture helps organizations integrate sustainable, high-yield food production into their operations—reducing costs, increasing efficiency, and ensuring consistent access to fresh, local produce.

Core Services

We provide custom consulting and turnkey solutions to help businesses, municipalities, and institutions embrace the future of farming. Our services include:

- Project Planning, Farm Design, & Implementation – Modular, scalable vertical farms tailored to operational needs.
- Operational Optimization – AI-driven automation and energy-efficient systems to streamline production.
- Sustainability Strategies – Solutions that use 90% less water and significantly cut transportation emissions, aligning with ESG goals.
- Market Integration & Business Planning – Strategies to maximize revenue and impact for food-focused businesses and institutions.

Industries We Serve

Our expertise supports a diverse range of clients, including:

- Grocery Stores & Retailers – Enhancing supply chain resilience and bringing fresh produce closer to customers.
- Restaurants & Food Service – Providing hyper-local, premium-quality ingredients year-round.
- Hospitals & Schools – Improving food security and nutritional access for communities.
- Corporate & Municipal Projects – Developing large-scale urban agriculture initiatives for economic and community growth.

Competitive Advantages

Shipshape AgWorks brings deep expertise in indoor agriculture consulting, including:

- Controlled Environment Agriculture (CEA) – Advanced precision agriculture techniques to maximize yield and quality.
- AI-Powered Crop Management – Data-driven technology optimizing growth conditions and reducing labor costs.
- Custom Modular Farm Design – Scalable solutions tailored to different operational goals and site requirements.

Why Shipshape AgWorks?

As a trusted partner in the future of food production, Shipshape AgWorks offers tailored, data-driven strategies that help businesses and institutions reduce costs, improve efficiency, and meet sustainability goals. Whether launching a new vertical farm, optimizing an existing operation, or exploring innovative food production models, we provide the expertise to make it happen.
